

Factsheet | 30 April 2020

TwentyFour Income Fund Limited (the 'Company', 'Fund') is managed by TwentyFour Asset Management LLP and is a non-cellular company limited by shares incorporated in Guernsey and registered as a closed-ended collective investment scheme with the Guernsey Financial Services Commission. Its shares are traded on the Main Market of the London Stock Exchange.

Fund Objective

The Fund aims to generate attractive risk adjusted returns principally through income distributions.

Investment Approach

The fund will invest in a diversified portfolio of predominantly UK and European Asset Backed Securities. Uninvested cash or surplus capital or assets may be invested on a temporary basis in cash and/or a range of assets including money market instruments and government bonds. Efficient portfolio management techniques can be employed such as currency hedging, interest rate hedging and the use of derivatives such as credit default swaps to help mitigate market volatility.

Shareholders may elect to realise all or part of their holdings of Ordinary Shares every three years. In the event that investors elect to realise all or part of their holdings of Ordinary Shares, the Company may, but shall not be obliged to offer to redeem, repurchase or purchase those Ordinary Shares. Any Ordinary Shares that are not redeemed, repurchased or purchased shall be converted into Realisation Shares. Assets and liabilities attributable to Shareholders holding Realisation Shares will be managed as part of a separate realisation pool and in accordance with an orderly realisation programme with the aim of making progressive returns of cash to the holders of Realisation Shares as soon as practicable.

This is only a summary; details of the investment policy, including investment restrictions, are set out in the Prospectus.

ESG Integration Policy

The Fund considers environmental, social and governance (ESG) factors in the investment process, utilising an integrated approach.

Key Risks

- **All financial investment involves risk. The value of your investment isn't guaranteed, and its value and income will rise and fall. Investors may not get back the full amount invested.**
- Past performance is not a reliable indicator of future performance, and the Fund may not achieve its investment objective.
- The Fund invests in structured credit products or asset-backed securities (ABS). The issuer of such products may not receive the full amounts owed to them by underlying borrowers, which would affect the value of the Fund. Credit and prepayment risks also vary by tranche which may affect the Fund's performance.
- The Fund has the ability to use derivatives, including but not limited to FX forwards, for hedging and EPM purposes only. This may magnify gains or losses.
- Typically, sub-investment grade securities will have a higher risk of issuer default, and are generally considered to be more illiquid than investment grade securities.
