

MI TwentyFour Investment Funds - Monument Bond Fund

This Factsheet is a marketing communication for professional UK investors only

Monument Bond Fund is managed by TwentyFour Asset Management LLP and is a sub-fund of MI TwentyFour Investment Funds, an umbrella open-ended investment company registered under the Financial Conduct Authority as a UK Authorised Investment Company with Variable Capital. MI TwentyFour Investment Funds is classified as a UK UCITS scheme.

Fund Objective

The Fund aims to provide an attractive level of income relative to prevailing interest rates whilst maintaining a strong focus on capital preservation. The Fund does not offer a capital guarantee or principal protection mechanism. Efforts to preserve the Fund's capital will be focused on the selection of underlying securities where the investment manager has a high degree of confidence as to the issuer's ability to repay the principal due.

Investment Approach

The investment policy of the Fund is to actively invest in a diversified portfolio of European and Australian asset-backed securities (ABS), rated at least BBB- (or equivalent) at the time of investment by one or more of Standard & Poor's, Moody's Investor Services and Fitch, where the securities will be backed by the assets of institutions and issuers such as, but not limited to, residential mortgages, commercial mortgages, automobile leases and loans, SME loans and other secured bonds. A portion of the portfolio may be held in cash or cash equivalents, such as treasury bills and government bonds, in order to help further enhance the Fund's liquidity. From time to time, it is possible that a significant portion of the portfolio may be invested in securities from a particular geographical region.

The Fund will also use derivatives, including but not limited to credit derivatives, to either optimise exposures or reduce them in line with the Investment Manager's market viewpoint, thereby giving the Fund the potential opportunity to perform through different market environments. The Fund is not managed in reference to any benchmark index.

Key Risks

- Limited participation in the potential of single securities
- Investments in foreign currencies are subject to currency fluctuations
- Success of single security analysis and active management cannot be guaranteed
- It cannot be guaranteed that the investor will recover the capital invested
- The structure of ABS/MBS and the pools backing them might not be transparent which exposes the fund to additional credit and prepayment risks (extension or contraction risks) depending on which tranche of ABS/MBS is purchased by the fund
- The fund has the ability to use derivatives, including but not limited to FX forwards, for hedging and EPM purposes only. This may magnify gains or losses.
