

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Bond Fund ("the Fund") I Gross Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B5VNH238. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to provide income and grow your investment.

The Fund will invest in a broad range of bonds (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. The Fund has a highly flexible investment policy which allows it to take advantage of current market conditions and future expectations.

The bonds will be 'investment grade' and 'non-investment grade', as determined by international agencies that provide such ratings. Investment grade bonds, whilst potentially producing a lower level of income than non-investment grade bonds, are considered to be lower risk.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, these techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movements of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 4-5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.78%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 31 March 2021.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.
