TwentyFour Income Fund

This Factsheet is a marketing communication for professional UK investors only

TwentyFour Income Fund Limited (the 'Company', 'Fund') is managed by TwentyFour Asset Management LLP and is a non-cellular company limited by shares incorporated in Guernsey and registered as a closed-ended collective investment scheme with the Guernsey Financial Services Commission. Its shares are traded on the Main Market of the London Stock Exchange.

Fund Objective

The Fund aims to generate attractive risk adjusted returns principally through income distributions.

Investment Approach

The Fund is actively managed and will invest in a diversified portfolio of predominantly UK and European Asset-Backed Securities. Uninvested cash or surplus capital or assets may be invested on a temporary basis in cash and/or a range of assets including money market instruments and government bonds. Efficient portfolio management techniques can be employed such as currency hedging, interest rate hedging and the use of derivatives such as credit default swaps to help mitigate market volatility. The Fund is not managed in reference to any benchmark index. Shareholders may elect to realise all or part of their holdings of Ordinary Shares every three years. In the event that investors elect to realise all or part of their holdings of Ordinary Shares, the Company may, but shall not be obliged to offer to redeem, repurchase or purchase those Ordinary Shares. Any Ordinary Shares that are not redeemed, repurchased or purchased shall be converted into Realisation Shares. Assets and liabilities attributable to Shareholders holding Realisation Shares will be managed as part of a separate realisation pool and in accordance with an orderly realisation programme with the aim of making progressive returns of cash to the holders of Realisation Shares as soon as practicable. **This is only a summary; details of the investment policy, including investment restrictions, are set out in the Prospectus.**

Key Risks

- Limited participation in the potential of single securities
- Investments in foreign currencies are subject to currency fluctuations
- Success of single security analysis and active management cannot be guaranteed
- It cannot be guaranteed that the investor will recover the capital invested
- The structure of ABS/MBS and the pools backing them might not be transparent which exposes the Fund to additional credit and prepayment risks (extension or contraction risks) depending on which tranche of ABS/MBS is purchased by the Fund
- Typically, sub-investment grade securities will have a higher risk of default, and are generally considered to be more illiquid than investment grade securities
- Derivatives entail risks relating to liquidity, leverage and credit fluctuations, illiquidity and volatility
- The Fund's investments may be subject to sustainability risks. The sustainability risks that the Fund may be subject to are likely to have an immaterial impact on the value of the Fund's investments in the medium to long term due to the mitigating nature of the fund's ESG approach
- The Fund's performance may be positively or negatively affected by its sustainability strategy.
- The ability to meet social or environmental objectives might be affected by incomplete or inaccurate data from third-party providers
- Information on how environmental and social objectives are achieved and how sustainability risks are managed in this Fund may be obtained from www.twentyfouram.com/responsible-investment
