MI TwentyFour Investment Funds - Asset Backed Opportunities Fund

This Commentary is a marketing communication for professional UK investors only

Market Commentary

- Summary:** The tone in credit markets continued to soften during March. In the European securitised market, collateralised loan obligations (CLOs) traced wider market moves, while technical allocation to the asset-backed security (ABS) market supported spreads. Primary activity in the ABS market fell somewhat but remained healthy with €11bn of issuance, and the CLO market remained active with €12bn of issuance. Secondary markets were more active, in both bid-wanted-in-competition (BWIC) and bilateral activity. BWIC ABS volumes reached €750m while they amounted to €1.8bn for European CLOs. Mezzanine ABS continued to outperform due to the strength of investor demand, while senior ABS performance was flat on the month. Investor participation in both primary and secondary markets was strong.
- ABS:** During March, €11bn was issued across ABS sectors, with a significant uptick in placement of European automotive and consumer transactions, all from established platforms. Coverage across tranches remained strong, in line with previous months. However, as this facilitated a tightening of the curve, AAA subscription increased. Final coverage across AAAs reached 2-3 times, which facilitated 5-10 basis points (bps) of tightening in the tranche. While there has been a lull in European residential mortgage-backed securities (RMBS) for the year, Credit Agricole printed an €800m transaction in the last week of the month at a final spread of 0.59% over Euribor, which left 1-2bps on the table. We continued to welcome issuance from the commercial mortgage-backed security market, where a dual-sponsor mixed UK deal was placed. The AAAs in the deal priced at the wide end of initial talk of 1.5% over SONIA, as investors showed sensitivity to collateral quality in the sector.
- CLO:** March witnessed a level of 'indigestion' in the CLO market, which was an issue that was highlighted last month. The European CLO market saw €12bn of supply, which included €5bn of new issues with a focus on resets. The situation was amplified in the US, where €14bn was issued, of which just €2.5bn was new. Wider market moves, along with significant CLO supply, contributed to the softening that occurred as the month progressed, which ramped up quickly. In Europe, AAA spreads moved 5-7bps to 126bps and BB spreads by as much as 100bps to 575bps. The move was more pronounced in the US and for CLO refinancings. The selling in the CLO market mostly came from US investors – which had been the largest buyers in January and February – as US risk sentiment turned. European loan markets moved in tandem and experienced a significant sell-off, ending almost 1 point lower at 97.6, which represented an opportunity for CLO managers ramping pools and equity returns.

Portfolio Commentary

- March was a relatively busy month for the Fund. In the CLO market, as spreads moved wider, the portfolio managers (PMs) deployed amortisations into BB CLOs in the primary market at spreads of 5.7% over Euribor. This followed a month of selling higher beta CLOs into a very strong rally, which gave the PMs the flexibility to add back at significantly wider levels and added yield to the Fund. In the European ABS market, the focus was on rotations from shorter consumer paper at spreads of 0.55% over Euribor into mezzanine RMBS, which included AA UK RMBS at 3.6% over SONIA. The Fund's positioning remains relatively liquid because of ongoing trade and geopolitical risk.

Market Outlook and Strategy

- The European securitised market decoupled during March, as CLOs, which are traditionally more highly correlated to the high-yield markets, were softened by wider credit moves and heavy supply. Ongoing strong demand for ABS products supported spreads in the market, despite the escalation in geopolitical risks and trade tensions.
- We expect supply from the European ABS market to intensify. However, this is expected to be matched by positive flows from international accounts and drive momentum in spreads. While consumers continue to display resilience and collateral performance is strong, inflationary sentiment from the UK Budget and trade policy of the new US administration will likely point to more stringent conditions for consumers. Thus, we continue to prefer established lenders with a strong track record.
- The PMs have for a long time favoured liquidity and flexibility. If US tariffs result in market volatility, then they believe this could present an opportunity to add bonds at significantly wider spreads. The CLO market has traditionally shown the highest correlation to credit markets. It is also the market with the most global buyer base and where the most opportunities are likely to present themselves.

Cumulative Performance	1m	3m	6m	1y	Annualised				Since Inception*
					3y	5y	10y		
I Gross Income Shares	0.11%	2.04%	4.59%	10.54%	8.69%	10.47%	N/A	5.96%

Past performance is not a reliable indicator of future performance. The performance figures shown are in GBP on a mid-to-mid basis inclusive of net reinvested income and net of all fund expenses. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. *Inception date 11 April 2017. The Fund aims to target a net total return of SONIA +500-800 basis points per annum.

Key Risks

- Limited participation in the potential of single securities
- Investments in foreign currencies are subject to currency fluctuations
- Success of single security analysis and active management cannot be guaranteed
- It cannot be guaranteed that the investor will recover the capital invested
- The structure of ABS/MBS and the pools backing them might not be transparent which exposes the fund to additional credit and prepayment risks (extension or contraction risks) depending on which tranche of ABS/MBS is purchased by the fund
- The Fund has the ability to use derivatives, including but not limited to FX forwards, for hedging and EPM purposes only. This may magnify gains or losses
- The Fund's investments may be subject to sustainability risks. The sustainability risks that the fund may be subject to are likely to have an immaterial impact on the value of the fund's investments in the medium to long term due to the mitigating nature of the Fund's ESG approach
- The Fund's performance may be positively or negatively affected by its sustainability strategy
- The ability to meet social or environmental objectives might be affected by incomplete or inaccurate data from third-party providers
- Information on how environmental and social objectives are achieved and how sustainability risks are managed in this Fund may be obtained from twentyfouram.com/sustainability

THIS COMMENTARY IS FOR FINANCIAL ADVISERS AND INSTITUTIONAL/PROFESSIONAL INVESTORS ONLY. NO OTHER PERSONS SHOULD RELY ON THE INFORMATION CONTAINED WITHIN THIS DOCUMENT. No recommendations to buy or sell investments are implied. The fund average rating is a weighted average calculation based on each bond's rating according to the fund's rating methodology. When calculating average credit rating, for non-rated bonds an internal rating is applied. Yield is shown gross of expenses. The yield figure is provided for illustration purposes only, should be regarded as an unaudited estimate that is subject to adjustment and therefore may not equal the realised income. The return of the securities may go down as well as up. The fund's volatility is calculated on a monthly (annualised) basis. If you invest indirectly through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. In making any investment into the Fund, investors should rely on the Prospectus and Key Investor Information Document (KIID) provided by the Authorised Corporate Director (ACD) of MI TwentyFour Investment Funds, and not the summary set out in this document. The Prospectus and KIID are also available from Apex Fundrock Ltd ("Apex"), Hamilton Centre, Rodney Way, Chelmsford, Essex, CM1 3BY and also available from their website as indicated above.

Past performance is not a reliable indicator of current or future performance. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed, if applicable. The return of the fund may go down as well as up, e.g. due to changes in rates of exchange between currencies. The value of the money invested in the fund can increase or decrease and there is no guarantee that all or part of your invested capital can be redeemed.

For definitions of the investment terminology used within this document please see glossary at: <https://twentyfouram.com/glossary>. TwentyFour Asset Management LLP is able to assist those institutional clients who require it with meeting their Solvency II (including its UK onboarding and onshoring legislation) obligations. In particular, TwentyFour Asset Management LLP will make all reasonable endeavours to comply with the Solvency II Regulations 2015 Article 256. Neither the fund, nor TwentyFour Asset Management LLP nor Apex make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of an assessment of ESG research and the correct execution of the ESG strategy. As investors may have different views regarding what constitutes sustainable investing or a sustainable investment, the funds may invest in issuers that do not reflect the beliefs and values of any specific investor.
