

TwentyFour Sustainable Enhanced Income ABS Fund

This Factsheet is for professional UK investors only/not for public viewing or distribution

The TwentyFour Sustainable Enhanced Income ABS Fund is managed by TwentyFour Asset Management LLP and is an open-ended sub-fund of the TwentyFour ICAV, an umbrella Irish collective asset-management vehicle with segregated liability between sub-funds. The Fund has been authorised by the Central Bank of Ireland as a Qualifying Investor Alternative Investment Fund (QIAIF).

Fund Objective

The investment objective of the Fund is to seek to achieve income and long-term capital growth.

Investment Approach

The Fund will seek to achieve a return for shareholders through investment in a portfolio of debt and debt related securities. Such debt and debt related securities shall primarily consist of asset backed securities (ABS), (including but not limited to, mortgage backed securities (MBS) and collateralised loan obligations (CLOs)). The Fund promotes environmental or social characteristics as part of its overall strategy and may limit investments to issuers that follow good governance practices, in accordance with Article 8 of the EU Sustainable Finance Disclosure Regulation. The Fund will be screened in accordance with the portfolio management team's view of appropriate ethical and sustainability principles. The screening process is designed to avoid investments in ABS transactions with exposure to or undertaking material production in tobacco, alcohol, gambling, adult entertainment, controversial weapons and carbon intensive industries, and companies involved in animal testing for cosmetic purposes. This list is not exhaustive and may change from time to time to reflect new developments and research in the field of ESG investments, for example where technology or social trends evolve. In addition, the portfolio management team will positively screen transactions through a comprehensive analysis process, which may include the use of specialised rating agencies and systems.

Key Risks

- Past performance is not a reliable indicator of future performance, and the Fund may not achieve its investment objective.
- The Fund invests in structured credit products or asset-backed securities (ABS). The issuer of such products may not receive the full amounts owed to them by underlying borrowers, which would affect the value of the Fund. Credit and prepayment risks also vary by tranche which may affect the Fund's performance.
- The Fund has the ability to use derivatives, including but not limited to FX forwards, for hedging and EPM purposes only. This may magnify gains or losses.
- Typically, sub-investment grade securities will have a higher risk of issuer default, and are generally considered to be more illiquid than investment grade securities.
- The Fund's investments may be subject to sustainability risks. The sustainability risks that the Fund may be subject to are likely to have an immaterial impact on the value of the Fund's investments in the medium to long term due to the mitigating nature of the Fund's ESG approach.
- The Fund's performance may be positively or negatively affected by its sustainability strategy.
- The ability to meet social or environmental objectives might be affected by incomplete or inaccurate data from third-party providers.
- Information on how environmental and social objectives are achieved and how sustainability risks are managed in this Fund may be obtained from www.twentyfouram.com/responsible-investment
