

Vontobel Fund – TwentyFour Absolute Return Credit Fund

**Legal Document:
SFDR Website Disclosure for Article 8 financial products**

Summary

The Sub-Fund promotes environmental and social characteristics and invests in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. Issuers will be screened in accordance with the Investment Manager's view of appropriate sustainability parameters as measured in the Investment Manager's proprietary Environmental ("E") and Social ("S") scoring model. Additionally, the Sub-Fund applies certain exclusion criteria with regards to products and activities related to unconventional / controversial weapons.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

In order to attain the environmental and social characteristics, the Sub-Fund applies the following ESG framework: exclusion approach, screening.

Exclusion approach:

The Sub-Fund excludes:

- securities of corporate issuers involved in products and activities related to: unconventional / controversial weapons (0%). The percentage indicated reflect the revenue threshold applied related to such products.

Screening:

- The Sub-Fund invests in securities of corporate issuers that pass the minimum combined E&S score (minimum is set at 15, on a scale from 0 to 100, with 0 being the worst and 100 being the best score), which is based on the Investment Manager's proprietary methodology. This score is the result of combination of qualitative and quantitative analysis. The Investment Manager's proprietary Observatory is a relative value system which combines third party data covering over 400 ESG metrics in conjunction with the portfolio managers' overall relative value decision making.

Additionally, the Sub-Fund follows an active engagement approach, which takes into account relevant environmental, social and governance matters. The Investment Manager sees these activities as a way to support the attainment of the environmental and social characteristics of the Sub-Fund.

The binding elements of the investment strategy used to select the investments to achieve the E/S characteristics promoted are as follows:

- The Sub-Fund excludes securities of corporate issuers that derive a non-negligible part of their revenues from excluded products and/or activities listed above.
- The Sub-Fund invests in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section above.

Finally, with effect from 1 January 2023, in an effort to measure the attainment of each of the E/S characteristics promoted, the Sub-Fund will report on the following sustainability indicators as part of its annual periodic reporting:

- Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund (excluded products and/or activities are indicated under the investment strategy section)
- Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section below

No sustainable investment objective

This financial product promotes environmental or social characteristics but does not have as its objective a sustainable investment.

Environmental or social characteristics of the financial product

What are the environmental or social characteristics promoted by this financial product?

The Sub-Fund promotes environmental and social characteristics and invests in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. Issuers will be screened in accordance with the Investment Manager's view of appropriate sustainability parameters as measured in the Investment Manager's proprietary Environmental ("E") and Social ("S") scoring model. Additionally, the Sub-Fund applies certain exclusion criteria with regards to products and activities related to unconventional / controversial weapons.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Investment strategy

What investment strategy does this financial product follow to select the investments to attain the environmental and social characteristics, and what are the binding elements of this investment strategy?

In order to attain the environmental and social characteristics, the Sub-Fund applies the following ESG framework: exclusion approach and screening.

Exclusion approach:

The Sub-Fund excludes

- securities of corporate issuers involved in products and activities related to: unconventional / controversial weapons (0%). The percentage indicated reflect the revenue threshold applied related to such products.

The exclusion listed below are applied with the revenue thresholds indicated¹:

EXCLUSION	CRITERIA	EXCEPTIONS APPLIED?
Sector/business activity-based exclusions		
Unconventional / controversial weapons	Upstream: 0% of revenues Production: 0% of revenues Downstream: 0% of revenues	None.
Sovereign exclusions		
UN Sanctions	The Investment Manager's Compliance team maintains a restricted list which is applicable to all assets managed by the Investment Manager.	

Screening:

The Sub-Fund invests in securities of corporate issuers that pass the minimum combined E&S score (minimum is set at 15, on a scale from 0 to 100, with 0 being the worst and 100 being the best score), which is based on the Investment Manager's proprietary methodology. This score is the result of combination of qualitative and quantitative analysis. The Investment Manager's proprietary Observatory is a relative value system which combines third party data covering over 400 ESG metrics in conjunction with the portfolio managers' overall relative value decision making.

Binding Elements

The binding elements of the investment strategy used to select the investments to achieve the E/S characteristics promoted are as follows:

- The Sub-Fund excludes securities of corporate issuers that derive a non-negligible part of their revenues from excluded products and/or activities listed above.

¹ The Investment Manager may apply exclusions to any three parts of the value chain or a combination. For example, Upstream could be financing including significant ownership of activities in the sector. Downstream could be distribution of products and services from the sector. The categories 'Upstream', 'Production', and 'Downstream' are used in the European ESG Template, and are included in this document for consistency.

- The Sub-Fund invests in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section above.

What is the policy to assess good governance practices of the investee companies²?

The investee companies are rated for governance aspects using the Investment Manager's ESG Observatory score. Common governance indicators include sound management structures, such as board independence and diversity, employee ownership, remuneration of staff, tax compliance, rights of minority shareholders, executive remuneration, and audit and accounting oversight. These Governance indicators are a major component of the Investment Manager's ESG Observatory score.

The Sub-Fund further intends to ensure good governance of the investee companies via active engagement. All engagements directly conducted by the Investment Manager are recorded in the Investment Manager's Observatory database.

Does the financial product consider Principal Adverse Sustainability Impacts? If yes, which areas/indicators are considered and how?

Yes No

The Investment Manager considers the list of principal adverse impacts on sustainability factors mentioned in the table below.

The Investment Manager identifies issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. When no reliable third-party data is available, the Investment Manager may make reasonable estimates or assumptions.

Where the Investment Manager identifies an investment as having a critical and poorly managed impact in one of the considered principal adverse impacts areas, and where no signs of remedial action or improvement have been observed, an action by the Investment Manager must be taken. The Investment Manager views engagement as an important tool in holding companies to account and encouraging pro social behaviour. Principal adverse impacts can be considered during engagement activities.

Information on how principal adverse impacts on sustainability factors were considered will be made available in the periodic reporting of the Sub-Fund.

The following *Principal Adverse Sustainability Impacts* Indicators³ are considered in the investment strategy:

TABLE # PRINCIPAL ADVERSE IMPACT INDICATOR

ENVIRONMENTAL ASPECTS	
Greenhouse gas emissions	
1	3 GHG intensity of investee companies (scope 1 and 2)
Energy	
1	4 Exposure to companies active in the fossil fuel sector
SOCIAL ASPECTS	
Controversial weapons	
1	14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Social and employee rights	
1	12 Unadjusted gender pay gap

² including with respect to sound management structures, employee relations, remuneration of staff and tax compliance

³ As set out in Table 1, 2 and 3 of Annex 1 of Regulation (EU) 2022/1288

Proportion of investments

What is the asset allocation planned for this financial product?

INVESTMENTS	PERCENTAGE (OF NET ASSETS)	TYPE OF EXPOSURES
#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.	At least 51%	Only through direct exposures
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.	Up to 49%	Through direct exposures for unscreened investments, through indirect exposures for hedging instruments.

Under “#2 Other”, the Sub-Fund may hold ancillary liquidity and use financial derivative instruments for investment and hedging purposes. While these instruments are not expected to detrimentally affect the attainment of the Sub-Fund’s environmental and social characteristics, no minimum environmental or social safeguards are applied. Other investments include also unscreened investments for diversification purposes or investments for which ESG data is lacking.

Derivatives are not used for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Monitoring of environmental or social characteristics

What sustainability indicators are used to measure the attainment of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the following list of sustainability indicators:

- Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund (excluded products and/or activities are indicated under the investment strategy section)
- Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section below

How are the environmental or social characteristics and the sustainability indicators monitored throughout the lifecycle of the financial product and the related internal/external control mechanism?

The information used for the implementation of the ESG framework, and consequently the attainment of the environmental and social characteristics, are reviewed on a regular basis.

If a security does not comply with the binding criteria described above, the Investment Manager divests from such an issuer within a time period to be determined by the Investment Manager without exceeding in principle three months after such breach was detected, considering prevailing market conditions, and taking due account of the best interests of the shareholders. The Board of Directors or the Management Company of Vontobel Fund may decide to further postpone the rectification of such a breach or decide to carry out the divestment in several instalments over a longer period of time in exceptional cases, provided this is considered to be in the best interests of the shareholders.

The Investment Manager is responsible for ensuring compliance with the binding elements applied by this Sub-Fund. Numerical ESG restrictions are coded in the Investment Manager’s trading and compliance system and the Investment Manager’s Risk function monitors alignment on a daily basis. Where the investment manager’s portfolio management team makes qualitative judgement-based assessments, this process is monitored through a combination of regular attestations by the investment teams and periodic sample checks by the Compliance team.

Methodologies

Exclusion approach:

The Investment Manager retains data from third party data provider in order to analyze an issuer’s exposure to activities excluded by the Sub-Fund, based on pre-defined thresholds. In order to qualify for initial investment, the issuer must not breach any of these exclusion criteria.

Screening:

As part of the investment selection process, the universe of investments of the Sub-Fund will be screened using the Investment Manager's proprietary environmental ("E"), and social ("S") scoring model. The Investment Manager believes that ESG factors can materially impact on a company's valuation, financial performance and related risk/return and as such, will consider pertinent ESG factors when determining whether the potential investee company is aligned with the overall objective of the Sub-Fund and in determining the E and S score. The range of ESG factors will not remain static and will evolve further over time and the ESG factors to be considered will vary depending on the investee company under consideration.

The Investment Manager will screen companies to determine whether the Sub-Fund should acquire or retain a position within its portfolio. If issuers have an E and S combined score below a minimum threshold (which is set at 15, on a scale from 0 to 100, with 0 being the worst and 100 being the best score) as determined by the Investment Manager, they will not be considered for investment (i.e. will be excluded from the investable universe based on the E and S score). The Investment Manager's active approach to ESG allows for a nuanced approach and the consideration of controversies (for example, predatory pricing or accidental pollution of the environment) and momentum (where an investee company has a credible plan to improve weaknesses identified in its EGS credentials). The E and S Scoring model helps the Investment Manager to identify key ESG issues that a specific sector or issuer may be facing.

The screening process involves a comprehensive analysis process, which may include the use of specialized rating agencies and systems, such as Observatory. As part of the screening process, the Investment Manager uses commercially available databases and frameworks. The use of specialized rating agencies and systems inform an initial E and S score of the investable universe. As a second step, the portfolio management team will undertake its own analysis to supplement this scoring. The Investment Manager's proprietary E and S Scoring Model provides all members of the portfolio management team with sector specific and issuer specific information on key issues. Based on this cumulative information, the Investment Manager applies its proprietary scoring model to calculate an issuer's E and S combined score of the investable universe. Data sources and processing

What are the data sources used to attain each of the environmental or social characteristics including the measures taken to ensure data quality, how data is processed and the proportion of data that is estimated?

The following data sources are used for the implementation of the investment process:

- External ESG data providers: ASSET4, and other third-party ESG data providers;
- Information directly provided by the issuers;
- Additional fundamental information from media, NGOs as well as international organizations.

In order to ensure data quality, the Investment Manager:

- Regularly reviews data;
- Uses multiple data sources;
- May directly engage with the issuers.

The data sources mentioned above are used in order to implement the following approaches: exclusion approach and screening.

The Investment Manager may make reasonable estimates, when data is lacking by using data made available by companies. Additionally, third party ESG data provider may use estimates themselves. The proportion of data that is estimated by the Investment Manager is indicated to be low to medium. For asset backed securities the proportion of data that is estimated by the Investment Manager based on data made available by companies is medium to high.

Limitations to methodologies and data

What are the limitations to the methodologies and data sources?

In assessing the eligibility of an issuer based on ESG research, there is a dependence upon information and data from third party ESG research data providers and internal analyses which may be based on certain assumptions or hypothesis that render it incomplete or inaccurate. As a result, there is a risk of inaccurately assessing a security or issuer. There is also a risk that the Investment Manager may not apply the relevant criteria of the ESG research correctly or that the Sub-Fund could have indirect exposure to issuers who do not meet the relevant criteria. This poses a significant methodological limit to the ESG strategy of the Sub-Fund. Neither the Sub-Fund, nor the management company nor the investment manager make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of an assessment of ESG research and the correct execution of the ESG strategy.

In order to maintain confidence that social and environmental characteristics are met, the investment manager may also engage with investees in order to fill data gaps or may use complimentary data from additional providers or directly from investee disclosures.

Due diligence

What is the due diligence carried out on the underlying assets at initial investment and what are the internal and external controls in place?

In order to qualify for initial investment, the investments aligned with the environmental and social characteristics must comply with the binding elements applied by the Sub-Fund. This compliance has to be ensured by the Investment Manager. For the elements that are in scope of the Sub-Fund's investment guidelines and subject to investment controls, the internal Investment Control unit has pre-trade checks mechanisms in place. The pre-trade checks allow portfolio managers to simulate trades and check each trade against restrictions, prior to placing orders, in order to prevent the occurrence of breaches. When submitting orders an automated check of the investment guidelines restrictions is performed, generating a warning to the portfolio managers, highlighting potential breaches that would materialize in case the orders would be executed.

Engagement policies

Is engagement part of the environmental or social investment strategy?

Yes No

If so, what are the engagement procedures?

The Investment Manager applies a comprehensive stewardship strategy. Engagement is part of the investment process. It includes communications between the management teams of investee companies, typically in case of specific issues or controversies that may cover ESG concerns or where data is lacking. Engagement may occur prior to investment, be ongoing or as a result of monitoring. The Investment Manager's Engagement Policy is available on its website www.twentyfouram.com

Additionally, the Sub-Fund follows an active engagement approach, which takes into account relevant environmental, social and governance matters. The Investment Manager sees these activities as a way to support the attainment of the environmental and social characteristics of the Sub-Fund.

Designated reference benchmark

Has a reference benchmark been designated for the purpose of attaining these characteristics promoted by the financial product?

Yes No

Important information

Subscriptions of shares of the fund should in any event be made solely on the basis of the fund's current sales prospectus (the "Sales Prospectus"), the Key (Investor) Information Document ("K(I)ID"), its articles of incorporation and the most recent annual and semi-annual report of the fund and after seeking the advice of an independent finance, legal, accounting and tax specialist. If you are in any doubt about the contents of this document or have any question, you should consult your professional and/or investment advisers.
